Abstract: *The purpose of this paper is to show the importance of multidisciplinary approach in higher education according to NPE 2020*

Education is the fundamental means of human development by it the innate power of human being are developed. By it the innate power of human being are developed their knowledge and skills are in hence their behavior is changed and they are made civilized and culture citizen. Through a multi-disciplinary approach a student gains and an arsenal of skills problem solving, critical thinking time management, self-management communication and writing analysis and research methodologies team work.And much more that are easily Transferable across work environment one of the benefits of multidisciplinary approach in education is you get a more Holistic understanding of the world.

An approach to curriculum integration which focus primarily on the the different disciplinary and the diverse prospective they bring to illustrate a topic them or issues multidisciplinary approaches in experimental learning can take place across all major programs and levels of students learning.Examples for in classes activities food included a students based on measures to work on collaborative project and reflect on how their different perspective in hence the words the national education policy has come as an anticipated move in 2020.The announcement of major changes in the education system has Revolution School And Higher Education reforms in the country.

Key Words:*Multidisciplinary approach, curriculum integration, Experiential Learning Collaborative Project Higher Education.*

Introduction:

Education is a complex word with many style values and philosopher when it comes to choosing what's right for you.it's important to take the time of figure out what kind of system fits your personal learning style especially you are the one paying for it the multi-disciplinary approach release on people across discipline to share knowledge thereby enhancing your scope and defect of learning interdisciplinary education is similar to multi-disciplinary in the sense that it looks to combine knowledge from multiple disciplinary one of the benefits of a multi-disciplinary approach in education is you get a more Holistic understanding of the world.Rather than looking at individual development and their subject matters separately a multi-disciplinary approach integrates parts of each department into the

study programs of other multidisciplinary approach is an approach to curriculum integration which focus primarily on the different disciplines and the diverse prospective they bring to illustrate or topic them or issue a multidisciplinary curriculum is one is in which the same topic is study from the point of view of more than one discipline.

The national Educational policy has come as an unanticipated move in 2020. The announcement of major changes in the education system has revolution school and higher education reforms in the country. Being announced after 34 years it is seriously debated move among the Indian educationists as the new policy aims at encouraging essential learning critical thinking and experimental learning.

The NEP 2020 is planned to support skill education and streamline educational planning administrative and management at all level it is believed to have saviral effect on higher education which is going to draw a new road map for young minds regulating the higher education system is impartive.

The previous structure of having multiple regulator bodies such as VGC, AICTE and NAAC, and various councils were believed to raise standardization concerns however the proposal to set up the Higher Education Commission of India HEGI envisages bringing uniformity in the system.

Its four independent verticals :-

- National Higher education regulatory council (NHERC)
- General education council ji higher education grant Council (GEC)
- National accreditation Council (NAC)

Are believed streamline the leg regulatory purpose.

The new policy process the setting up of multi-disciplinary universities by 2030 in every district the new education policy process credit base degree with a wide range of subject and emphasize on extra curricular activities. Student will be flexible to major in engineering coupled with morning Liberal Arts and vice-a-versa.

Multidisciplinary approach:

A multidisciplinary approach involves drawing appropriately from multiple discipline discipline is to explore problems outside of normal bound areas and reach solution based on a new understanding of complex situation

Curriculum integration:

The process of combining articulating learning content and subject with a view of promoting holistic and comprehensive learning

Experiential Learningm :

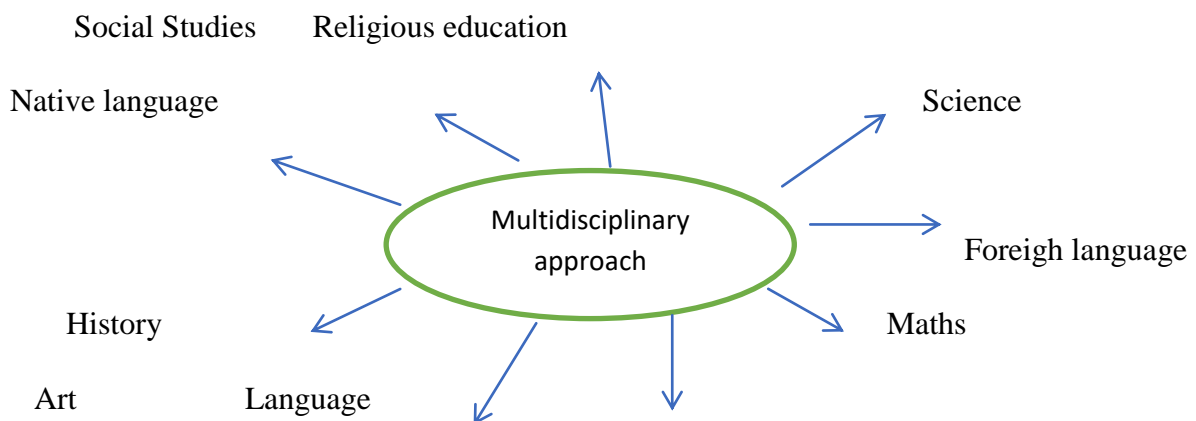

Experiential learning is the process of learning through experience and is more narrowly defined as learning through reflection on doing.

Collaborative Project:

collaborative project management call operative project management is a method used to plan for coordinate control and monitor distributed and complex project.

Higher Education:

Higher education is tertiary education leading to award of an academic degree higher education also called post Secondary Education tertiary level of the tertiary education is an options optional final stage of formal learning that Ecuador of after completion of Secondary Education.

The multidisciplinary approach a teacher candidate's perspective on the development of media School.

Multidisciplinary curriculum :

- **Holistic understanding**
- **different perspective**
- **Real world approach**
- **Collaboration Skills**

Holistic understanding:

One of the benefits of a multidisciplinary approach in higher education is you get a more Holistic understanding of the world rather than looking at individual department and their subject matter separately a multi-disciplinary approach integrates parts of each department into the study program of the other. For example the Nijmegen School of Management waves Business Administration into the economic program and looks at Business Administration and Political Science as part of the geography planning and environment programme.

Different perspective:

Have you ever been trying to solve a puzzle by yourself and have one situation that totally defeats you a multi-disciplinary approach is kind of like that it's opens the doors to different ideas and ways of understanding.

Real world approach:

Multi disciplinary learning is not just an Educational Philosophy it's a tangible way of understanding the world when you graduate you will be working with people from across discipline I R L so why should school be different being able to compile and collaborate with the people from across the spectrum will be you functional in the professional world.

Collaboration Skills :

Hopefully any education route you take emphasizes the importance of callibration however one of the most important advantage of multidisciplinary curriculum is the idea of coming together to create a better whole being able to communicate effectively with people across disciplines in integral to learning you learn the same vocabulary you understand their values and you know what motivate them these skill will help you make connections solve big problems and work synergistically with your peers.

Conclusion:

The focus on making education multi-disciplinary is a significant step that will benefit the student and one that will have for reaching affect the Government of India has done a tremendous job in creative creating and enabling ecosystems for offering multi-disciplinary education of flourish and making a different to students who in turn will make an impact on the future of our country with creative combinations of subject cutting a curriculum flexible options and and multiple extremely and exist options during the under undergraduate course student can explore this area of interest in also choose Carriers of these toys in addition this kind of approach will Foster intellectual curiosity critical process self reflections leadership and teamwork skills a sense of commitment professional isms to once scenario culture environment.
