Abstract :

This paper focused on social environment maintain by libraries through our collective time in the library world. Libraries invite people from on array of lived experience backgrounds perspective and beliefs to sure space together and to engage in conversation where they can share their own stories as well as listen to the stories of others. Libraries have unlimited potential to expand their community impact when we bring our communities together in conversation. We connect people back to our shared humanity libraries have along bean considered a symbol of culture in this view library exit for the definition of knowledge and to promote stories purpose of culture and story.

Introduction :

As a democratic and democratizing institution, libraries have a mission to connect the public with necessary information. as well as provide free and open access to the library for all citizen. libraries play a vital role in connecting communities by offering shared space for learning collaboration and cultural exchange. Libraries have long been considered a symbol of culture in this view libraries exist for the diffusion of knowledge and to promote serious purpose of culture and study.

Libraries today continue to save the ideals of free and open access to ideas and information and intellectual freedom. in 21st century as digital age libraries are encouraged to be the center of community life going beyond traditional services to be community builders and places where people get involved.

Libraries are perfectly position positioned two nature this democratic practice they are open to all. Lifelong learning has long been a mission of libraries. Today's libraries have offering and programs for people of all ages.

Some ways to libraries connect communities :

1) Event and Workshop :

Libraries organize varies events such as author talks, workshop and seminars. to bring people together for shared learning experiences.

2) Book Clubs :

Hosting book clubs encourages reading and provides a forum for discussion, creating a sense of community among book enthusiastic.

3) Technology Access :

Libraries offer computer and internet access, narrowing the digital divide and providing

opportunities for online teaching and communication.
